DeBeer Waterbase Technology - the way of the future

Car Refinishing is becoming an increasingly specialised branch of work. Car coating manufacturers and users are faced with the ever-increasing demands of technological developments, environmental measures and complex colour combinations. Now there is pressure from insurance companies and the general market to operate more environmentally responsible. The DeBeer VOC compliant product range certainly offers you an effective, user-friendly and comprehensive paint system.

Car Refinish businesses find that switching to VOC (Volatile organic compound) compliant 900 series basecoat is comparatively simple and in most cases requires minimal investment. The system can be integrated into full down draft or semi down draft spray booths, however, experience shows that to get the full benefits and efficiencies from a water based system additional drying apparatus or blow drying systems dramatically shorten drying times.

Some of the benefits are

- Waterbase 900 series is an entirely 'non stirring' system
- Holds more pigment than solvent, achieving better paint coverage
- Excellent coverage with minimal coats, reducing application times
- Better colour accuracy, especially to modern OEM colours
- Significantly lower emissions of VOC's (Volatile Organic Compounds)
- Waterborne paints are non hazardous & non flammable, resulting in a safer workplace for employees

“ The Water Base 900 series is one of the most user-friendly water based systems currently available. ”

Your Paint Smart representative can assist with a paint shop audit to gauge your readiness for the use of water base technology.

Applying the Water Base 900 Series

Application is just as simple as applying any customary basic solvent based system. Application is fast and simple, and blending is very straight forward and simple. Unlike some other water based systems on the market the base coat can be repaired easily if you have a problem before clear coat is applied. By using Water Base 900 Series you can easily reduce your application times.

If you would like to discuss the Water Base 900 Series, please contact your Paint Smart sales representative.

Earn I-CAR Award Points through Valspar Automotive

I-CAR New Zealand and Valspar Automotive in conjunction with DBNZ Coatings are pleased to announce the recent industry training alliance partnership between Valspar Automotive and I-CAR New Zealand.

As the exclusive importer of the Valspar Automotive product ranges, DBNZ Coatings has been running a very successful training program for the past 15 years. Training is conducted in a state-of-the-art automotive training centre based in Hamilton, New Zealand.

I-CAR, Valspar and DBNZ Coatings are very excited to offer the opportunity for attendees to not only up-skill on the latest products and processes from the industry, but to also offer the ability for both the shop owner and the tradesman to be recognised through the I-CAR award point system.

See your local Paint Smart distributor for these exclusive deals!

Premium Cotec Products for your home

Exterior Products

Walls present a range of weather proofing, decorative and maintenance issues, be they residential, commercial or industrial. Walls are the most visible part of buildings and therefore require careful consideration in the selection of the correct system. **Contact us today for the best advice on which Cotec product suits your building exterior.**

Interior Products

The feel of a room is very largely a combination of colour, texture and wear-ability. Some rooms provide a harsh service environment, while others demand perfect finishes in critical side lighting conditions. For ceilings, the need for a dead flat defect free finish demands critical formulation to achieve the best results. All these factors mean you need a range of paint finishes to provide the right finish on each surface. **Again, contact us today for the best advice on which Cotec product suits your interior situation.**

Roof Coatings

Cotec Roof Coatings have stood the test of time and have been used throughout New Zealand's harsh climate for many years. Standard colours matching the industry roofing colours are available and non

standard colours can be matched provided the colour can be made using the pigments available.

Swimming Pool Coatings

At Linkup Paints we have the products to paint your swimming pool with ease and give you a quality durable finish. Cotec is one of the very few paint companies that have specialised coatings for swimming pools and stand behind them! **We offer and strongly recommend an inspection and specification which we can organise free of charge, simply contact your Linkup sales representative or the office.**

Concrete Floor Coatings

Wear and tear on floors from foot traffic, cars and equipment can be considerable. Making sure the right product is designed and used for a specific environment is important if maximum life is expected. With any concrete floor it is vitally important to prepare the surface correctly and select the correct coating product. This is why we offer a free service to inspect and provide a specification for your floor. **Please contact your Linkup sales representative for more details or to discuss an inspection of your floor.**

Contact Linkup Paints today to talk about what you need for your home...
